BIOPHORA – Customized Peels

Glycolic Peel

Glycolic acid has the smallest molecular particle size, is the most potent of AHA's and penetrates more effectively and deeply than any other AHA. For this reason the peel is designed to target element exposed / normal aging skin conditions for patients who desire faster results. Available in 20-50 % concentrations.

Salicylic Peel

Different from glycolic or lactic acids, salicylic acid works within the deeper layers of the skin and is best suited for acneic skin. Salicylic acid is an antibacterial, oil solution which is considered one of the best peels for relieving acne conditions.

Lactic Peel

Lactic acid is much larger a molecular size, cannot penetrate as fast or as deeply as glycolic acid, and is considered a moisturizing agent. For these reasons, lactic acid is best suit for people who require a less aggressive exfoliation and milder approach to skin rejuvenation. A gradual smoothing, brightening and clearing of skin blemishes will be accomplished.

Clarisonic

Pre-Procedural Cleansing

Pre-procedural cleansing with the Clarisonic Skin Care System is integrated in many professional offices. Proper and thorough skin cleansing Now With 4 Speeds, to help ensure deep cleansing and gentle exfoliation.

Facial

Use Clarisonic as the first step in all facial procedures. Cleansing is the most important step in any skin care routine. Clarisonic cleanses more than twice as effectively as manual cleansing, and patients also enjoy the stimulating massage effect of Clarisonic.

Better Absorption

Cleanses so well that products absorb better. A study had demonstrated up to 61% greater product absorption of Vitamin C after using Clarisonic.

For Different Skin Types

Clarisonic is safe for all skin types.

New! Spot Therapy Brush Head

For cleansing areas of the body needing extra care and attention, including the décolleté, hands, arms and elbows and feet.

Yours and Mine Skin Care System

The perfect set in white and graphite gray. Now you don't have to share.

IPL + Thermage Create Great Results

The Monthly top 10 Surgical Questions

Top Ten Questions to Review for March Break

1) *How long does it take to recover from a facelift?*

Answer- the initial swelling and bruising rapidly decreases after 5 to 7 days. You will look overdone in the first 3 weeks.

2) *How long do lip injections last?*

Answer- this depends on the shape of your lips and the filler. In general it lasts 8 months to a year.

3) *Will I feel any pain with injections?*

Answer- No- for most injections the area is frozen. The freezing lasts 1 to 2 hours.

4) *What fillers do you use in the lips?*

Answer- there are several- **Perlane, Restylane, Evolence Breeze**

5) *What are **Evolence** and **Evolence Breeze**?*

Answer- They are injectable fillers- used for contouring the face and the lips. They are made from Collagen- that's right! Good old collagen. They last for one year. They do require precise injection- and give amazing results in the right patient. They have a very low reaction rate- minimal bruising- you can have your lips done and go out the same night!!!!

6) *Is there a product that works as well as **BOTOX Cosmetic**™?*

Answer- NO- Allergan has done many side by side studies as well as there are independent studies that show to date there is no product/cream/lotion or potion that is as effective as **BOTOX Cosmetic**™ BOTOX in softening the lines and shaping the face.

7) *Is there a topical botulinum Toxin that works like **BOTOX Cosmetic**™?*

Answer- There is a product that is going to start clinical trials soon. The timeline for availability is unknown.

8) *Can I buy **Latisse** from my doctor?*

Answer- NOT YET. Latisse is approved in the USA but it may be a while

before it is approved in Canada.

9) *Can I do more than one surgical procedure at one time? Like Breast Augmentation and Tummy Tuck?*

Answer- Yes- you can do more than one surgical procedure- We try to limit the operating time to 5 or 6 hours.

10) *If I have loose skin on my tummy after pregnancy or weight loss- will doing sit ups help tighten the skin?*

An Answer- NO- sit ups will help with the muscle tone and improve your fitness- good preparation for surgery!!! The skin will remain loose and if you want it tightened then you will have to have Thermage done or have a tummy tuck.
